

4. In Romans 1:19-20, Paul says to the Gentile Church that recognizing that God created the world should affect the choices we make. How does recognizing God as Creator affect the choices we make? How does it affect how we approach science?
  
5. In 1633, a Tribunal of the church punished Galileo for promoting the shocking notion that the earth moves around the sun and not the other way around. He was placed under arrest for his statement. Do you believe the church overstepped its boundary in its response to Galileo's statement? Why or why not?
  
6. When we do not recognize God as our creator, what are the consequences?
  
7. In Romans 1:18 Paul says, "... the wrath of God is revealed from heaven against all ungodliness and wickedness of those who by their wickedness suppress the truth." Discuss what you think Paul means by this statement.

8. When science believes in the power of God, there is a respect and care for God's precious gift of life and the directions it takes and how boundaries are set. Discuss what you think this statement means and give examples of when you think science has made decisions with this in mind.
  
9. Rabbi Hardd Kushner says, "For the person of integrity, life may not be easy but it is simple. Figure out what is right and do it. All other considerations come in second." How can one do both religion and science and do both with integrity?
